Functionality in Emergency Situations

Back-Up Power

With our current infrastructure, there are two locations within our network where backup battery is a concern; Central Offices and ONT locations at the customer premise. Each are addressed below:

Central Offices (CO)

Midstate Telecom has three Central Offices serving 100% of our customer base. The switching and transport systems inside these COs are powered by DC power with current draws ranging from approximately 15 amps to 45 amps. The runtime of each battery system is slightly different based on current draw and battery size but they range from approximately 12 hours to approximately 40 hours. We possess a 60KW portable generator for deployment of any outage we anticipate to be longer than the battery run times, thus ensuring Central Office operation throughout a power outage.

ONT

The ONTs are located at every customer premise in our Midstate Telecom service area. We have approximately 1023 deployed ONTs delivering service to 100% of our subscribers. Any ONT located within the city limits are equipped with a minimum of an expected runtime of 8 hours. Knowing the power failures outside the city limits can be longer, we deploy a larger battery providing additional runtime. These batteries are 20AH and deliver an expected runtime of greater than 16 hours.

Rerouting of Traffic around Damaged Facilities

All core network connections are ring protected and any established traffic is automatically rerouted without impact to these customers. Any call not yet established for in a "Setup" state during a reroute situation (fiber cut, Central Office failure, etc.) would fail and these callers would need to re-acquire dial tone and re-place the call. The routes would be available in less than one second, thus any subsequent call attempts would be successful.

Our connection to the outside world is via our centralized equal access provider: South Dakota Network (SDN). The Kimball office is positioned in the logical center of our network and houses a node on the above mentioned statewide DWDM MPLS network. This network utilizes alternate fiber routes throughout the state of South Dakota functioning in a mesh environment to deliver our traffic to the SDN location in Sioux Falls, South Dakota. As for our Intra-company Inter-exchange facilities, they include: three EPS rings (Calix), one OC 48 ring (Fujitsu), and one MPLS ring (Brocade) functioning in a mesh environment.

Lower Brule Chairman
Lower Brule Tribe
PO Box 187
Lower Brule, SD 57548-0187

Dear Chairman:

The Federal Communications Commission (FCC), as part of its 2012 Order reforming the federal universal service mechanisms related to telecommunications and information services, adopted new "Tribal Engagement" provisions that are intended to improve communications and foster a greater understanding between service providers and Tribal entities of the factors necessary to deploy and sustain telecommunication services on Tribal lands. See FCC Public Notice, Office of Native Affairs and Policy, Wireless Telecommunications Bureau, and Wireline Competition Bureau Issue Further Guidance on Tribal Engagement Obligation Provisions of the Connect America Fund, DA 12-1165, released July 19, 2012.

Pursuant to the FCC's rules related to Tribal Engagement Midstate Communications would, as soon as possible, like to begin discussions with the Lower Brule Tribe in a manner consistent with the FCC rules. Accordingly, we would request a meeting with the Tribe and it is our hope that this meeting could be held sometime prior to the end of October, 2015. The purpose of this meeting will, generally, be to exchange information related to the deployment and provisioning of communications services on Tribal lands.

While Midstate Communications leaves to your discretion attendees from the tribe at this requested meeting, it is important that at least some of the tribal representative attendees at the meeting are "decision-makers," as this can change the perspectives of the discussions. Midstate Communications asks that the Lower Brule Tribe provide a name and contact information for a Tribal representative who can assist in scheduling and arranging a meeting with the appropriate Tribal government staff and leaders to discuss deployment and sustainability of telecommunications services on Tribal lands. This information may be provided to the undersigned by calling (605) 778-6221, or through an e-mail directed to mark@midstaff.net.

Thank you for your cooperation in this matter. We look forward to discussing these important matters with you.

Sincerely,

A handwritten signature in black ink, consisting of a stylized 'M' followed by a long, sweeping horizontal line that curves slightly upwards at the end.
